

## Hearing Services

A traveling teacher will come to the classroom and work directly with students who qualify for hearing services based upon the student's hearing impairment. These services are provided to students determined eligible through the evaluation process.

This teacher may assist the classroom teacher in making modifications to the classroom and recommendations for optimal seating for the student to best hear. The teacher works with the student to develop their hearing skills to the fullest extent possible and to access their education. In addition, the teacher assists with trouble shooting assistive listening devices and providing resources for sign language instruction if needed.

Traveling teachers work closely with classroom staff as well as other related service providers. Traveling teachers will complete and send home Quarterly Progress Reports for each quarter. An annual review meeting will be conducted to review your child's progress on individual goals and objectives then to determine goals and objectives for the next year.
