

MSI IV MONTHLY MONITOR - MAY

Dear Parents,

Today was a great time! The students really loved the Airport. Mr. Baker and his son Ben were very polite. They showed us the control tower and the hangar where they make repairs. They had several planes and a glider in the hangar. Then Mr. Keith showed us his airplane. We even got to sit in the plane. We had a few that were a little "scared" but they braved it. Woo hoo!!

Then it was off to Subway to order and pay for our meals. Finally we ate at the City Park. We had a good time but cut our trip short because of the heat and gnats. We ended the day watching "Casper - A New Beginning". What a great way to end our school year!

It is hard to believe that we have only 1 day left of school. Monday is a short day for the High School Students. Students will be dismissed and can be picked up at 11:00 if you choose or they can remain in the classroom until buses run at 1:45.

It has been a very good year. The students made advances in their academics but more importantly, I have seen very good growth in maturity and how they handle stressful situations as well as independent skills. The students have worked hard up until the last day, but I can say with confidence that we are all ready for a break. The summer will surely fly by and before you know it, we will be back in school. I am including a school calendar for next year.

It has been a pleasure getting to know each and every one of your students. Enjoy your summer with them. Before you know it, they will be adults! Thanks for all your support this school year.
