Science Experiment this month

Important Information

December brought us a lot of fun holiday activities. We have been continuing weekly cooking activities. We have been working on spreading skills and using the microwave independently. Please continue to allow your child to help with the microwave at home. Continue to work on their functional skills: set the table, sort/put away silverware, sort the laundry, sweep the floor, fold wash cloths, pour a cup of water, and get the ingredients from the fridge and the cabinet when you are cooking. All of these skills will help your child to be independent. We are also working on using iPad and computer skills. We are working on typing or writing names, addresses, phone numbers, and birthdays to help when we need to fill out forms in high school.

If your child is displaying any symptoms of illness, please keep your child home. We are trying to help keep all students and staff healthy. COVID symptoms include: fever, cough, shortness of breath, difficulty breathing, fatigue, body aches, headaches, loss of taste or smell, sore throat, congestion, runny nose, nausea/vomiting, and diarrhea. Thank you for your help!
